NISSAN 240RS

BS110

The early 80's brought about a new rally regulation: Group B. These new rules opened the door for a firestorm of innovation, and manufacturers responded by creating some of the most powerful, fast, and truly manic rally cars the world had ever seen. Nissan entered the fray with its tried-and-true formula of simplicity and durability, manifested in the 270ps 2WD 240RS. Although it was outclassed for the new category, nonetheless the 240RS became a fan and privateer “underdog” favorite. Over its career, it would showcase its strengths to score impressive podium finishes against technologically advanced competitors.
